

# SUNSMART POLICY

## CREEKSIDE K-9 COLLEGE

Last Ratified by School Council	Review Date	Responsible for Review
May 2023	May 2026	School Council

### Purpose

The purpose of this policy is to support sun protection behaviours at Creekside K-9 College to minimise risk of health problems from sun overexposure, including skin cancer.

This policy provides guidelines to:

- support staff and students to use a combination of sun protection measures when UV index levels are 3 or above (generally mid-August to the end of April in Victoria)
- ensure that there are outdoor environments that provide adequate shade for students and staff
- ensure students are encouraged and supported to develop independent sun protection skills to help them to be responsible for their own protection
- support our school's strategies to meet its duty of care and occupational health and safety obligations to minimise harmful UV exposure and associated harm for students and staff.

### Scope

This policy applies to all school activities on and off-site, including camps and excursions. It is applicable to all students and staff.

### Policy

Overexposure to the sun's ultraviolet (UV) radiation can cause health problems including sunburn, damage to skin and eyes, and an increased risk of skin cancer. UV damage accumulated during childhood and adolescence is strongly associated with an increased risk of skin cancer later in life.

UV radiation:

- cannot be seen or felt

- can be reflected off surfaces such as buildings, asphalt, concrete, water, sand and snow
- can pass through light clouds
- varies in intensity across the day and the year (highest from mid-August to the end of April in Victoria)
- peaks during school hours.

Sun safety is a shared responsibility and staff, parents and students are encouraged to implement a combination of sun protection measures whenever UV levels reach 3 or above. Information about the daily local sun protection times is available via the [SunSmart widget](#) on the school's website/intranet, the free [SunSmart app](#), or at [sunsmart.com.au](http://sunsmart.com.au) or [bom.gov.au](http://bom.gov.au).

Creekside K-9 College has the following measures in place for all outdoor activities during the daily sun protection times to help reduce the risk of overexposure to UV radiation for staff and students.

## **Shade**

Creekside K-9 College provides sufficient options for shelter and trees to provide shade on school grounds, particularly in places such as:

- where students congregate for breaks
- the canteen
- outdoor lesson areas (big shade)
- popular play areas

Students are encouraged to use available areas of shade when outdoors during peak sun protection times, particularly if they do not have appropriate hats or outdoor clothing.

When building works or grounds maintenance is conducted at Creekside K-9 College that may impact on the level of shade available to staff and students, a review of the shaded areas available will be conducted and further shading installed as appropriate.

## **Sun protective uniform/clothing**

Creekside K-9 College's uniform or dress code includes sun-protective clothing, including:

- loose, cool, densely woven fabric
- shirts with a collar and/or high necklines

- longer style shorts, dresses and skirts

Creekside K-9 College's uniform or dress code applies on and off-site unless otherwise advised. When students are not required to wear school uniform (such as school camps, free dress day), Creekside K-9 College will ensure steps are taken to encourage students to wear sun-protective clothing whenever UV levels reach 3 and above.

## **Hats**

For terms 1 and 4, all primary school students must wear a sun protective hat that shades the face, neck and ears for all outdoor activities. Hats may also be worn for all outdoor activities outside of the August to April time period, by parent or student choice.

As we are also a secondary school, we expect secondary students to take responsibility for their sun safety by wearing a hat during outdoor activities and adopting other sun protection measures such as wearing sunscreen or using shade.

Students wear a school hat or a hat that protects the face, head, neck and ears when outdoors, for example broad-brimmed, legionnaire or bucket hat.

Baseball or peaked caps and sun visors are not considered a suitable alternative, as they do not protect the ears, cheeks or neck.

Students who are not wearing appropriate protective clothing or hats will be asked to use available areas of shade when outdoors or a suitable area protected from the sun.

## **Sunscreen**

Creekside K-9 College encourages all staff and students to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen daily whenever UV levels reach 3 and above. Sunscreen should be applied at least 20 minutes before going outdoors, and reapplied every two hours (or more frequently if sweating or swimming).

Creekside K-9 College has strategies in place to remind students to apply sunscreen before going outdoors [for example, reminder notices and sunscreen available to students from CTLs/year level coordinators].

Students who may suffer from skin reactions from certain types of sunscreen are encouraged to contact class teachers/home group teachers to implement a plan to reduce the risk of a sunscreen reaction at school, such as families sending their child to school with a suitable alternative sunscreen.

## Sunglasses

Where practical, Creekside K-9 College encourages students and staff engaged in outdoor activities to wear close-fitting, wrap-around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible.

## Curriculum

Students at our school are encouraged to make healthy choices. They are supported to understand the effects of sun exposure and are encouraged to be involved in initiatives to promote and model sun protection measures to the whole school. Creekside K-9 College will address sun protection and UV safety education as part of daily routines and reminders across K-9. **Students who require education in applying sunscreen will be provided with this by the classroom teacher.**

## Staff role-modelling and OHS

Staff are encouraged to access resources, tools, and professional learning to enhance their knowledge and capacity to promote sun smart behaviour across the school community.

UV radiation exposure is considered as part of our school's risk management and assessment for all outdoor events and activities, i.e. UV radiation protection strategies are included in school camp activities, excursions, sports days and interschool sports events.

## Community engagement

Sun protection behaviour is regularly reinforced and promoted to the whole school community through daily bulletins, school website and student and teacher activities.

Families, students and staff are provided with information, ideas and practical strategies to support UV safety at school and at home. Creekside K-9 College may provide information through noticeboards, Compass platform & school website.

## COMMUNICATION

This policy will be communicated to our school community in the following ways:

- Available publicly on our school's website
- Hard copy available from school administration upon request.
